1203343	10/20/2009	Hecla offers EPA the opportunity to come to their law office to review all of their boxes. Hecla stated that it was too resource intensive to review all the boxes. Hecla stated that once all documents were submitted to Hecla for copying, then Hecla would make a CBI determination.	
1203603	01/29/2010	"As we discussed with Toeroek, some of the documents contained in the enclosed CDs, may have been subject to confidential provisions contained in previously terminated agreements related to the Creede Mining District. The current status of those confidentiality provisions is not entirely clear, and Hecla has attempted to contact parties that may have an interest under those provisions. Given those contractual provisions, and in order to ensure that EPA receives the scanned documents in a timely manner, Hecla has presently marked the enclosed documents as "Company Confidential" in accordance with 40 C.F.R. § 2.203 (b). Signed by Scott Hardt.
